React Frontend Developer
KGIT Services
Bangalore
2022 – 2023

Project

Project Name	:	Concrete Mix-Design Industry
Organization	:	KGIT Services(Litvik Software Labs Private Limited)
Duration	:	Jun 2022 to Dec 2023
Client	:	VRMX, Vasantham, Velavan, SRC, ACE, RCC Concrete
Environment	:	Javascript and react
Tools used	:	GITLAB EE, Visual Studio Code, Postman, Swagger file
Role	:	React Frontend Developer

Project Description

We created a Ready-Mix Concrete Web Application. To connect clients and fulfill the client and user requirements. Our ERP Software is fully customized to suit the needs of Ready-Mix Concrete Companies with the capability to manage multiple locations. Our cloud-based Database and Advanced Reporting tool has an easy-to-use interface with plant locations. Cloud Hosting, there is no need to invest in costly hardware and infrastructure setup. Every plant needs only a Personal Computer and internet connection to hook into the Litvik.

Key Responsibilities

- Writing React component interaction between front-end and API Integration
- Implementing **REST-API** to consume data for application
- Creating reusable components across projects to re-use the system
- To manage API's integration
- Fulfill the Client and User Requirements and fix the bugs in the application
- Used **Agile** methodology process in the development project
- Responsible for preserving code and design integrity using **GIT**.

React Frontend Developer
Interim Caps India Private Limited
Chennai
2024-present
